

# THE CLOUD ENABLEMENT COMPETENCE CENTER

## ENTER THE **AGE OF THE CLOUD**

To embrace the digital age, it is not enough to buy a new technology: **digital transformation is a process that includes changing your organization, skills, methodologies and tools.** Do not go through this journey alone! Let our Cloud Enablement Competence Center guide you through the advantages of modern cloud technologies, including **Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), Cloud Automation and Application Containerization.**

## A PATH **FULL OF CHOICES**

### The Advantages of Open Source

The choice of technology is not a decision to be taken lightly: the adoption of **open-source solutions** allows your infrastructure to evolve while maintaining a high level of autonomy in technological choices. It also guarantees the maximum interoperability between components and ensures you will be able to manage your resources modularly, allowing you to respond quickly to the changing needs of the market.

### Private, Public or Hybrid?

Regardless of the service model (IaaS and PaaS) you choose, it is essential to decide how to manage infrastructure resources such as computing, storage, and networking. The three delivery models respond to different needs.

### Delivery Models

#### Private Cloud

All resources are dedicated to a single client.

#### Public Cloud

Each client is assigned a tenancy within a shared infrastructure.

#### Hybrid Cloud

A mix of dedicated (on-site or off-site) & shared (3rd-party) resources.

## SELECT **INDUSTRY-STANDARD TECHNOLOGIES**

Par-Tec's **Cloud Enablement Competence Center** brings together numerous professionals specializing in the most mature and reliable cloud technologies, carefully chosen to support both customers focused on public clouds and on on-premise services.

Par-Tec is a **Red Hat Premier Business Partner** and **Google Cloud Partner**. Over the years, we have developed the technical skills and experience required to support even the most complex transformations in your IT services and infrastructures.

## OUR **DEDICATED SERVICES**

Our team is at your disposal to support you at every stage of your cloud journey:

- **Pre-adoption advice** designed for Engineering, Development and Operations teams
- **Turnkey design and deployment** of new Private, Public and Hybrid Cloud IaaS and PaaS platforms, including multi-cloud strategies
- **Support for the migration of services and the re-engineering of applications**, for a gradual and efficient transition from the technologies already in use
- **Integration with pre-existing systems and services** engineered by the Customer and/or by third parties
- **Engineering of new services and related development pipelines** custom-designed to leverage all the advantages of DevOps and cloud computing
- **Operations support** to ensure full efficiency and operation of the platform and services

Par-Tec is considered one of the most active system integrators on the Italian, open-source scene. We create innovative and customized solutions and offer high-profile professional services aimed at Large Enterprises, SMEs and the Public Sector.

Our competence centers, distributed between Milan and Rome (as well as the coworking centers of Pistoia e Pomezia) specialize in IT infrastructure, cloud enablement, vertical applications for the financial market, industry 4.0, business intelligence, compliance, training, and many other areas.
