DISCOVER THE FULL **RANGE OF OUR SERVICES**

The services offered by Par-Tec answer the growing need for professionalism in the design, support, monitoring, management, maintenance and troubleshooting of IT service delivery platforms and business processes. Choose the mode that best suits your current needs.

Solution Delivery

For a complete and customized solution, we'll start with a cost and feasibility check. Then, after designing the project together, we will take care of implementation, ensuring compliance with the requirements, the timeline and, above all, the quality.

On-Premise Managed Services

Through our on-premise specialized teams, we ensure continuous IT monitoring and support for companies. The services are organized according to the needs of the customer, with personalized hourly coverage, 24x7 availability and a dedicated site manager.

Professional Services

For technical activities - executed in Italy and abroad, on-site and remotely - we provide highly-specialized teams who, in the event of a sudden malfunction, ensure system recovery in a very short amount of time.

Par-Tec Control Center

The Par-Tec Control Center is a shared control room, comprising different skills, levels of specialization and areas of intervention. It offers a 1st and 2nd level remote monitoring service with customized SLAs and hourly coverage.

Par-Tec is considered one of the most active system integrators on the Italian, open-source scene. We create innovative and customized solutions and offer high-profile professional services aimed at Large Enterprises, SMEs and the Public Sector.

Our competence centers, distributed between Milan and Rome (as well as the coworking centers of Pistoia e Pomezia) specialize in IT infrastructure, cloud enablement, vertical applications for the financial market, industry 4.0, business intelligence, compliance, training, and many other areas.
